Problem 5.6b Explain your translation 21. (Why did you translate it this way?)

Problem 5.6c The word for 'coconut' is *niu*. List all the ways to say 'my coconut' and explain what they could mean.

'Weapon' refers to a club-like tool. A 'yam' is an edible starchy root. 'Kava' is a ceremonial drink.

The subscripts SG, DU, PL refer to singular (one person), dual (two persons), and plural (more than two persons), respectively. The subscript INCL means inclusive ('our_{INCL}' = belonging to me, you, and them, in contrast with 'our_{EXCL}' = belonging to me and them, but not you).

Rules: Structure:

- Inalienable possession (kinship, body parts): na Noun–Poss

- Alienable possession: na C–Poss Noun

Poss = possessive (suffix):

1SG = *-qu* 3SG = *-na* 2DU = *-mudrau* 3PL = *-dra*

2SG = *-mu* 1PL incl. = *-da* 2PL = *-munī*

C = class:

- *ke-* = food and objects we do not own, but affect us.
- *me-* = drinks
- *no-* = otherwise (owned objects)

Problem 5.6a	19. <i>na utoqu</i>	26. <i>na kemudrau ika</i>
	20. <i>na mena yaqona</i>	27. <i>na memunī wai</i>
	21. <i>na kena yaqona</i>	28. <i>na luvena</i>
	22. <i>na kequ draunikau</i>	29. <i>na noda waqa</i>
	23. <i>na nomudrau draunikau</i>	30. <i>na nodra yapolo</i>
	24. <i>na nomu dali</i>	31. <i>na medra maqo</i>
	25. <i>na kemunī dali</i>	

Problem 5.6b In example 21 we used the classifier *ke-*, since the action is indirectly reflected towards the person. It is not she who drinks the kava, but someone else drinks it in her honour.

Problem 5.6c Since a coconut can clearly not be an inalienable possession, there are three different possible translations:

na kequ niu = ‘my coconut’ (for eating / I’ll be hit with)

na mequ niu = ‘my coconut’ (for drinking)

na noqu niu = ‘my coconut’ (I own / I sell)

Problem 5.8

Colours (Vlad A. Neacșu, RoLO 2018)

Brent Berlin and Paul Kay have studied colour terms of more than 100 languages by travelling the world and asking the locals to describe photos of different colours (Berlin & Kay 1969). After examining the results, they concluded that colour perception in all of these languages is governed by the same law.

Here are the colour terms in 12 of the languages the two scientists examined:⁵

e. Alabama: 'green' = *okchakko*, 'red' = *homma*, 'brown' = *laana*, 'blue' = *okchakko*, 'yellow' = *laana*.

Explain why they do not follow the hypothesis of Berlin & Kay.

Problem 5.8d Formulate the hypothesis of Berlin & Kay.
